X-CRYPTO 9900

Introduction

X-Crypto 9900 provides optimal security, privacy and safety. This crypto smartphone comes with only special developed crypto mobile programs. This crypto smartphone has blocked other third-party and app-store applications for security reasons.

X-Crypto 9900 is especially developed for intelligence, investment, banking, pharmaceutical, research, law enforcement and governmental professionals, for those who work daily with confidential information, sensitive data, organizational data and classified knowledge.

X-Crypto 9900 enables users to use the smartphone for CONFIDENTIAL-level critical communications. It prevents eavesdropping and substantially reduces vulnerability to malicious applications and tampering.

X-Crypto 9900 enhances the mobility and flexibility to organizations at a time when the importance of being able to act swiftly and to communicate without any risk of eavesdropping, data & information leaks. Industrial espionage is highlighted time and time again by political instability and developments in society.

X-Crypto 9900 is the world's first dual-sim crypto smartphone for more modularity, productivity and global connectivity with 4G, 3G and 2G global connections.

X-Crypto 9900 Security Features

The X-Crypto 9900 is a maximum secure and private encrypted smartphone where no third-party applications or smartphone features has access to. It is developed for the ultimate security and privacy of the user and organization.

All X-Crypto 9900 smartphones are standard equipped with Secure and Encrypted mobile programs for optimum privacy, security, and secrecy.

X-Crypto 9900 includes the patent-pending privacy software program named "X-DEVICE", that gives you the control over your own privacy. Welcome the world's safest privacy program for mobile devices ever developed.
